Use of SALPHOS in the F.C.I. Godowns

2310. SHRI MOHAMMED AMIN : Will the Minister of FOOD be pleased to state :

(a) whether it is a fact that SALPHOS are used to protect wheat, rice and other grains which are stocked in F.C.I. godowns from insects;

(b) if so, whether Government have obtained medical opinion about the adverse effect of this chemical powder on the health of the people who consume these foodgrains; and

(c) whether arrangements are being made to convert the F.C.I. godowns into cold storage where the use of SALPHOS will not be required; if not, the reasons therefor ?

THE MINISTER OF STATE IN THE MINISTRY OF FOOD (SHRI KALP NATH RAI) : (a) and (b) Yes, Sir. Celphos (not Salphos) is the trade name for Aluminium Phosphide and Hydrogen Phosphide which are used by Food Corporation of India to protect foodgrain stocks from insects. Taking into account the health aspects, the Ministry of Health have prescribed a maximum tolerance limit of 0.05 mg./kg. for the residue of this pesticide in foodgrains under Prevention of Food Adulteration Rules, 1955.

(c) No, Sir as it is not an economically viable proposition.
